DETAILED ACTION

1. This is the first Office Action on the merits of Application No. 10/718,732 filed on 11/21/03. Claims 1-4 are currently pending.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Craig (US 4,402,238) in view of Hokusho et al. (US 4,541,306).

Craig teaches a transmission differential gear comprising a transmission housing (40), an axle (12), spider gears (14), a differential carrier (18), a sleeve (46) which encircles the differential carrier (18), and means (48, 50) to attach the sleeve (46) to a ring (20) of a ring and pinion (22, 20) of the differential carrier (18).

Craig does not show a pin to retain the axle (12) in the differential carrier (18).

Hokusho et al show a differential including a pin (22) to retain the axle (20) in the differential carrier (12).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the transmission differential gear of Craig to have a pin to retain the axle in

Art Unit: 3681

the differential carrier in view of Hokuscho et al in order to prevent the rotational movement of the axle relative with the carrier thereby the noise, friction and heat are avoided.

Regarding claim 2, the sleeve (46) comprises an annulus having a width at least as great as a diameter of the axle (12) (see Fig. 1).

Allowable Subject Matter

4. Claims 3 and 4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Cited Prior Art

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Forrest'505 and Downs et al.'431 which each shows a differential including a pin for rigidly attaching the axle to the carrier. Hagin et al'488, Baker'535, Brisabois'248, Tsuchiya et al.'244, Koto et al.'646, and Ibusuki'594 which each shows a differential including means for keeping the axial movement of the axle relative to the carrier.

Communication

6. Submission of your response by facsimile transmission is encouraged. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 872-9326 for regular communications and (703) 872-9327 for After Final communications. Recognizing the fact that reducing cycle time in the processing and examination of patent applications will effectively increase a patent's term, it is to your benefit to submit responses by facsimile transmission whenever permissible. Such submission will place the response directly in our examining group's hands and will eliminate Post Office processing and delivery time as well as the PTO's mail room processing and delivery time. For a complete list of

Art Unit: 3681

correspondence not permitted by facsimile transmission, see M.P.E.P. 502.01. In general, most responses and/or amendments not requiring a fee, as well as those requiring a fee but charging such fee to a deposit account, can be submitted by facsimile transmission. Responses requiring a fee which applicant is paying by check should not be submitting by facsimile transmission separately from the check. Responses submitted by facsimile transmission should include a Certificate of Transmission (M.P.E.P. 512). The following is an example of the format the certification might take:

I hereby certify that this correspondence is being facsimile transmitted to
the Patent and Trademark Office on _____

(Date)

Typed or printed name of person signing this certificate:

(Signature)

If your response is submitted by facsimile transmission, you are hereby reminded that the original should be retained as evidence of authenticity (37 CFR 1.4 and M.P.E.P. 502.02). Please do not separately mail the original or another copy unless required by the Patent and Trademark Office. Submission of the original response or a follow-up copy of the response after your response has been transmitted by facsimile will only cause further unnecessary delays in the processing of your application; duplicate responses where fees are charged to a deposit account may result in those fees being charged twice.

7. Any inquiry concerning this communication or earlier communication from the examiner should be directed to Examiner Ho whose telephone number is (703) 305-0738 (or 571-272-7091 after April 2005). The examiner can normally be reached on Monday-Friday from 7:30 A.M. to 5:00 P.M. Eastern Standard Time. If attempts to reach the examiner by phone are unsuccessful, the examiner's supervisor, Mr. Charles Marmor, can be reached at (703) 308-0830 (or 571-272-7095 after April 2005).

8. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
